NOTICE

The following notice of intent to construct, submitted in accordance with Utah Administrative Code Rule R307-401 and has been received for consideration by the Executive Secretary, Utah Air Quality Board:

Tru Crushing, Inc, P.O. Box 84171, Salt Lake City, Utah 84171

Location: Various Locations Throughout the State of Utah

Project Description: Intent to Approve New Portable Aggregate Processing Equipment.

This plant would emit all air pollutants at the rate of less than 100 tons per year.

The engineering evaluation has been completed and the project would not result in adverse air quality impacts. It is the intent of the Executive Secretary to approve the project.

The completed engineering evaluation and air quality impact analysis showed that the proposed project meets the requirements of federal air quality regulations and the State air quality rules. The Executive Secretary intends to issue an Approval Order pending a 30-day public comment period. The project proposal, estimate of the effect on local air quality and draft Approval Order are available for public inspection and comment at the Utah Division of Air Quality, 150 North 1950 West, Salt Lake City, UT 84114-4820. Written Comments received by the Division at this same address on or before December 22, 2004, will be considered in making the final decision on the approval/disapproval of the proposed approval order. Email comments will also be accepted at jlblack@utah.gov. If anyone so requests to the Executive Secretary at the Division in writing within 15 days of publication of this notice, a hearing will be held in accordance with R307-401-4, UAC.

NOTICE

A notice of intent for the following project submitted in accordance with §R307-401-1, Utah Administrative Code (UAC), has been received for consideration by the Executive Secretary, Utah Air Quality Board:

ATK Thiokol Propulsion

Location: 9160 N Hwy 83, Promontory, UT 84302-689

Project Description: ATK Thiokol Propulsion – Promontory, operates a rocket motor manufacturing plant, located 28 miles west of Brigham City, on US Highway 83, Box Elder County. This modification involves ATK Thiokol re-routing the exhaust from the E-517 Buff Room to the outdoors. This unit has been in operation for many years and currently exhausts the air inside the building after being filtered. However, recent process review flagged the Buff Room exhaust as a potential source of contamination for E-517 bonding operations. In order to remove this potential contamination, the exhaust will be vented outside through the roof. Box Elder County is an attainment area of the National Ambient Air Quality Standards (NAAQS) for all pollutants. New Source Performance Standards (NSPS), National Emission Standards for Hazardous Air Pollutants (NESHAP) and Maximum Available Control Technology (MACT) regulations apply to this source but not to this modification. Title V of the 1990 Clean Air Act applies to this source. There will be a 5 lb per year increase in PM₁₀ emissions. The changes in emissions will result in the following, in tons per year, potential to emit totals: PM₁₀ = 41.72, VOC = 30.00, HAPs = 15.00.

The completed engineering evaluation and air quality impact analysis showed that the proposed project meets the requirements of federal air quality regulations and the State air quality rules. The Executive Secretary intends to issue an Approval Order pending a 30-day public comment period. The project proposal, estimate of the effect on local air quality and draft Approval Order are available for public inspection and comment at the Utah Division of Air Quality, 150 North 1950 West, Salt Lake City, UT 84114-4820. Written Comments received by the Division at this same address on or before December 24, 2004, will be considered in making the final decision on the approval/disapproval of the proposed approval order. Email comments will also be accepted at nmeli@utah.gov. If anyone so requests to the Executive Secretary at the Division in writing within 15 days of publication of this notice, a hearing will be held in accordance with R307-401-4, UAC.
